

# WG-600<sup>®</sup> WG-600<sup>®</sup>

## Whisker-Reinforced Ceramic Inserts

WG-600<sup>®</sup> is the only commercially available second-generation ceramic-composite cutting tool that uses the technology of whisker reinforcement. WG-600<sup>®</sup> inserts are unparalleled for finishing high-strength alloy materials. They achieve length-of-cut times up to six times greater than current benchmarks for ceramic insert grades. WG-600<sup>®</sup> is also a great choice for hardened steels, hard irons and plasma sprays.

Contact your Greenleaf representative or call our customer service office for information about standard or special-design insert styles available in WG-600<sup>®</sup>.
